

**MARYLAND  
CLIMATE  
TEACH-IN**

## **Join Maryland's Second Annual Teach-in**

### **APRIL 1-7, 2024 – KICK OFF EARTH MONTH!**

Maryland is a leader among states in setting ambitious goals to reduce climate pollution and crafting plans to achieve them. Education is critical to realizing our shared vision.

Maryland's Climate Teach-In encourages educators to adopt flexible and innovative approaches to engage around climate change. From 15-minute discussions to interactive modules and public events, the goal is to encourage Marylanders of all ages to explore climate solutions.

Your participation in the 2024 Maryland Climate Teach-in is a crucial step towards a more sustainable and informed future.

Join educators from across the state who have registered to incorporate climate change into their lesson plans by:

- Conducting a climate focused Q&A
- Making journal entries and organizing community circles with prompts on climate change topics
- Welcoming guest speakers
- Exploring the challenges of measuring the impacts of climate changes
- Learning about the water cycle
- Creating posters encouraging individual action
- Welcoming a guest speaker
- Examining reuse and repurposing
- Calculating individual carbon footprints
- Watching a climate related video
